

Archer ESG Disclosure Management

Businesses have increasingly prioritized Environmental, Social, and Governance (ESG) reporting to measure their commitment to sustainability and responsible corporate practices. Many companies are now aware of the importance of measuring and managing ESG performance to reduce risks and seek out opportunities for growth.

The Challenge

As businesses navigate their ESG journey, the imperative of producing comprehensive and trustworthy ESG reports becomes crucial. This entails not only communicating outcomes effectively to stakeholders but also adapting to the evolving landscape of mandatory reporting requirements in various jurisdictions worldwide.

The recent transition from voluntary to mandatory reporting adds layers of complexity, prompting companies to seek streamlined and automated processes for sustainability reporting. This entails not just efficiency but also a sophisticated approach to leveraging data across diverse reporting frameworks interchangeably.

Furthermore, ensuring the integrity and reliability of information is vital. Companies ought to deliver investor-grade data in an auditable format. Meeting these demands presents a formidable challenge that requires an innovative and efficient ESG disclosure solution.

The Archer ESG Solution

The Archer ESG Disclosure Management use case is a comprehensive solution addressing the growing demand for transparency in ESG reporting. Serving small businesses and large corporations, providing a complete solution that aligns with leading voluntary and regulatory frameworks.

By leveraging Archer ESG Disclosure Management, companies can streamline the process of collecting, structuring, and generating reports in alignment with key sustainability frameworks. This includes adhering to the Task Force on Climate-related Financial Disclosures (TCFD) recommendations and the Global Reporting Initiative (GRI) 2 General Disclosures.

In addition to these voluntary frameworks, Archer ESG Disclosure Management now offers a cutting-edge capability tailored to comply with regulations such as the EU Corporate Sustainability Reporting Directive (CSRD) and International Financial Reporting Standards (IFRS) S1 and S2. This innovative set of capabilities empowers companies to efficiently gather all requisite disclosure points, organize them systematically, and produce comprehensive reports, ensuring compliance and enhancing transparency in their ESG disclosures.

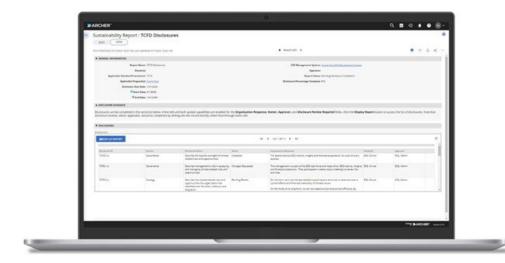

Lastly, companies can tap into Archer IRM suite to apply a holistic approach toward their ESG disclosures. By implementing Archer ESG solutions with a broader Archer IRM program, business leaders can establish and test proper controls for disclosures, mange identified issues and draw insights and tools needed to protect the business while adhering to their ESG policies.

Features
