

# Archer ESG Management

Markets are shifting faster than ever, and many organizations are stuck in a reactive mode, focused on keeping up instead of getting ahead. Environmental, Social, and Governance (ESG) offers a structured way for companies, investors, and stakeholders to assess business practices and their broader impact on people and the planet. Adopting strong ESG practices is critical for driving growth, supporting innovation, and building long-term resilience.

ESG is more than just enacting policies to address the social concerns of the day. In a study by the Harvard Business School of 180 companies, organizations that adopted sustainability practices had better operational performance and financial outcomes than those that did not.

These positive results should not be surprising. Organizations with more diverse workforces can bring multiple points of view and perspectives to the table, often resulting in faster innovation and new ideas for solving problems and a better understanding of how to adapt to global pressures and changes than organizations that do not. And it's not just about having a diversified workforce that enables organizations to outperform their rivals. By implementing responsible social and sustainability policies and programs that help lessen corporate environmental impact, organizations can better deal with global crises, such as rising energy prices and access to resources, and enact better operational resilience programs.

Organizations that embrace and implement robust and effective ESG programs benefit society, investors, and stakeholders and ultimately ensure the organization's ability to thrive and survive long into the future.

## The Archer ESG Management Advantage Solution

The Archer ESG Management solution provides enterprise-wide assessment, mapping, monitoring, reporting, and quantification of the organization's ESG programs. Archer ESG Management delivers business leaders a complete and aggregated view of the organization's value chains and its ability to meet its social and sustainability responsibilities. Executives and Board members can use Archer's ESG Management graphical, real-time reporting, and dashboards to visualize and evaluate ESG performance within their organizations and across the entire supply chain. This actionable data helps inform better decision-making and achievement of corporate goals. The gained insights provide visibility into potential risks that must be managed and business opportunities that can be leveraged.

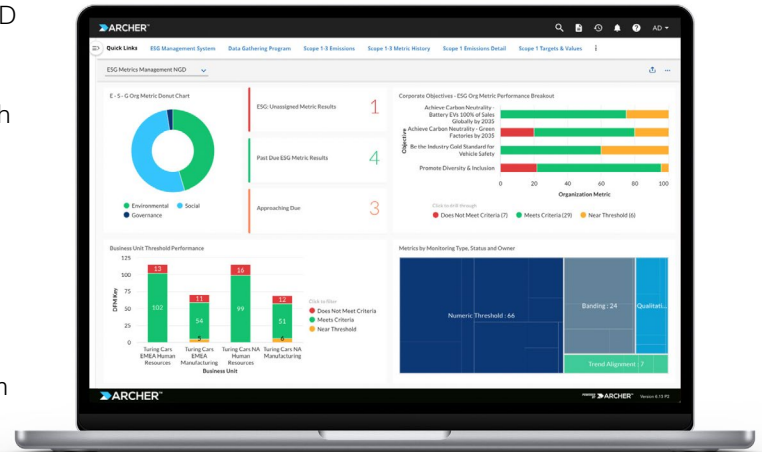

Archer ESG Management enables ESG data to be gathered and integrated with Archer's integrated risk management (IRM) platform. By implementing Archer ESG Management as a part of a broader IRM program, business leaders and executives have access to quantifiable risk data that provides the insight and tools needed to protect the business while adhering to ESG policies.

## Features

- Set up your corporate sustainability program structure and organizational hierarchy for ESG reporting.
- Perform a single materiality assessment to identify the most critical ESG topics
- Efficiently collect ESG data from internal and external sources
- Map your ESG data and report against voluntary standards and frameworks, including SASB, GRI, UN SDG and IFRS S1 & S2
- Collect required metrics for the European Sustainability Reporting Standards (ESRS) under the Corporate Sustainability Reporting Directive (CSRD).
- Leverage integration with Archer CarbonManagement to evaluate your carbon footprint
- Create, track, and execute corporate sustainability objectives to hit targets and milestones

## Benefits

- Automate your ESG data collection and management
- Understand what is material for your business and prioritize your sustainability efforts
- Assess performance against thresholds using intuitive, graphical reporting and dashboards
- Gain insight into ESG metrics from analytics and visualization data representation
- Gather all the required metrics to comply with CSRD ESRS
- Provide investors, stakeholders, and regulators with actionable, real-time reporting on ESG initiatives and trends
- Improve the organization's long-term performance and viability
- Centralize ESG data and leverage broader risk management capabilities in the Archer IRM platform

## About Archer

For more than 20 years, Archer has pioneered holistic governance, risk and compliance (GRC) solutions that empower enterprise organizations to more effectively manage risk, ensure compliance, and address emerging challenges. Leveraging advanced technology like artificial intelligence (AI) and risk quantification, Archer's broad range of solutions and services provide our clients with a clear understanding of risk that drives strategic decision-making and operational resilience.
