

Third Party Risk Management

Managing risk across your extended enterprise with Archer

©2023 Archer Technologies LLC. All rights reserved.

It's a risky world...so what are you going to do about it?

Your organization is increasingly using third parties to help deliver your products and services. Regardless of industry, organization have become an interwoven combination of organizations working together. These relationships range from providing a critical component to your product to a multitude of other inputs from across your supply chain. Some of these vendors take your products to market; others are integral to provide services to your customers; some simply help keep the lights on and the organization humming.

As more third-party products and services are used to conduct business, the potential for adverse events and the impact of poor performance by one of these contributors to your organization increases. The result is the acceleration of risks related to the extended enterprise and unfortunately, most organizations do not have adequate staff and available resources to manage them.

With Archer, your third-party risk management efforts can transform into a strategic advantage for your organization.

- Proactive decision-making: By identifying critical third parties and their contribution to the organization, risk management efforts can be prioritized to focus on the third parties that matter most or represent the highest risk.
 - **Reduced costs:** Assessing risk of third parties can be resource intensive. Creating a repeatable, manageable process reduces the amount of effort required.
 - Agility within the organization: Optimizing external relationships allows the organization take advantage of opportunities
 - Improved performance: Simply put third parties are essential to your organizational performance and governing their contribution to your organization allows you to optimize your strategy.

Integrated risk management with Archer reduces costs, enhances assurance and resilience and improves performance by powering proactive decision making.

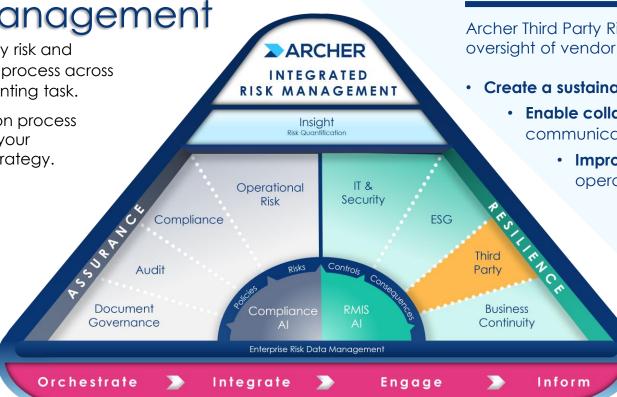

Purpose Built for Third Party Risk Management

Standardizing your third-party risk and performance management process across the enterprise can be a daunting task.

You must establish a common process that must be connected to your broader risk management strategy.

You need a platform that connects the dots between third parties and your organization, helps you focus on the most critical third parties, and **enables you to take an impact driven approach.**

Public

How does Archer help you?

Archer Third Party Risk Management automates and streamlines oversight of vendor relationships.

- Create a sustainable, agile program for the entire organization;
 - Enable collaboration between teams to ensure communication and data sharing;
 - Improve visibility into risks that could disrupt your operations; and
 - **Drive efficiency** for everyone involved with streamlined workflows and processes.

ORCHESTRATE YOUR THIRD-PARTY RISK MANAGEMENT PROGRAM

Archer Third Party Risk Management supports the full life cycle of thirdparty management – initial risk assessments, engagement risk assessments and performance monitoring - with streamlined and automated processes within a central system.

INTEGRATE INTO YOUR SYSTEMS

Archer connects to operational systems to leverage data from other tools like procurement systems and third-party assessment tools.

ENGAGE YOUR ORGANIZATION

Archer provides a purposebuilt experience for your internal users, vendors and third parties to quickly and easily provide input into risk and vendor assessments.

INFORM YOUR ORGANIZATION

Real-time dashboards and reports provide a better understanding of third-party risks, insight into potential areas of concern and a level of confidence that your third parties are contributing as you've designed.
