It's a risky world...so what are you going to do about it?

Risk management is a crucial element of any business strategy. Financial pressures are forcing companies to inspect how risk is either prevented or mitigated as much as possible to reduce any unnecessary impact. When a risk event happens, most often it is a direct reflection of how well controls are operating. However, companies encounter difficulties tracking incidents that lead to insurance claims due to complex operations, non-standardized reporting, poor record-keeping, and delays in reporting. Also, the many insurance policies that help transfer risk and cover losses are difficult to track and map to assets in an organization. All of this is exacerbated when you rely on manual processes, disparate systems or spreadsheets to manage such an important aspect of your risk management program. A modern Risk Management Information System not only improves how well you are covering risk exposures via insurance but provides valuable insight into the effectiveness of controls within your operations.

With **Archer RMIS AI**, you can streamline your insurance claims and incident processes, organize your insurance program and gain critical inputs to improve your overall risk management strategy.

- **Proactive decision-making:** By tracking incidents and identifying systemic problems, you can make informed decisions to improve controls to mitigate potential issues before an impact to the business.
- **Reduced costs:** By analyzing your operational incidents, you can optimize your policy coverages to match your business, saving money along the way.
- Enhanced resilience: A robust loss management framework brings insight to operational events and helps you better prepare and bounce back quickly from unexpected events.
- Improved performance: By analyzing losses, incidents and claims, you can make the right decisions within your operations to achieve your strategic goals.

Optimizing your incident, claims and insurance process is a key part of protecting your business against losses that affect the bottom line.

Purpose Built for Risk Management

Your choices are straightforward when it comes to tackling this crucial element of your risk management strategy. Spreadsheets and manual processes will never keep up with the data and the business.

You need a platform that is in intelligent, simple to deploy, easy to use and configured to your needs.

Public

How does Archer RMIS AI help you?

Our integrated AI solution is focused on delivering your core requirements and insights without the complexity and overdesign of traditional RMIS platforms.

- Create an Intelligent, sustainable and agile program for insurance, claims and incident management.
 - Improve visibility by consolidating data and enabling analytics to optimize your risk mitigation strategies.
 - Drive efficiency for both your • risk managers and analysts and your business operations.

ORCHESTRATE YOUR INSURANCE AND CLAIMS PROGRAM

RMIS AI takes a simple approach to streamlining your incident, claims and insurance processes. You can centralize data, automate these processes, collect timely, actionable information and drive risk-based business decisions.

INTEGRATE INTO YOUR INFRASTRUCTURE

RMIS AI enables you to consolidate policy and claims data from carriers and brokers into one system so you can analyze and draw insights from across the program. ©2024 Archer Technologies LLC. All rights reserved.

ENGAGE YOUR OPERATIONS

RMIS AI delivers a streamlined **user experience** for first line business users to report incidents, file claims and provide input into your program.

INFORM YOUR ORGANIZATION

With premiums, trend analysis on incidents and claims, and performance metrics at your fingertips, you can provide insights to your business and optimize your risk mitigation strategies.

Leveraging RMIS in your Risk Management Strategy

Experience matters when it comes to managing

risk. Archer has been focused solely on risk management and helping organizations for over 20 years. We have built our reputation on leading the industry delivering innovative solutions to emerging challenges while building a strong, sustainable integrated approach to risk management.

The Ideal Solution for You

Archer RMIS AI is an intuitive and costeffective solution for insurance and exposure data management, claims management, and incident reporting.

> With centralized data, automated workflows, easy to use reporting and advanced analytics, you can create a program that is sustainable, high value, and crucial to your risk management strategy.
