

# Archer<sup>®</sup> SaaS

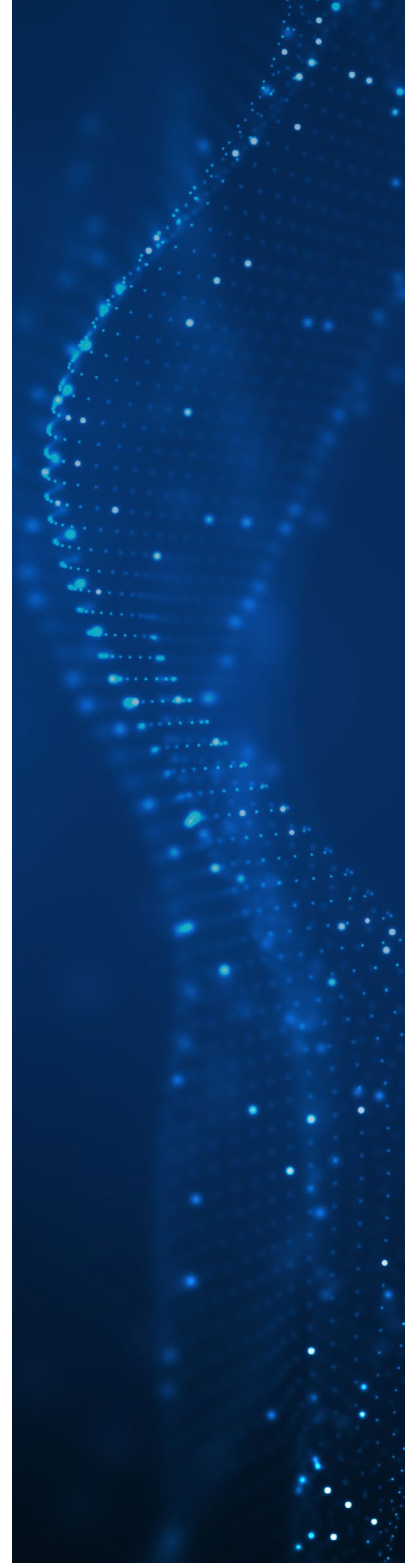

## The Challenge

Many organizations struggle with the cost, complexity, and resources needed to support the deployment and ongoing maintenance of on-premises applications and platforms for risk and compliance management. This applies to both large companies with IT departments looking to become more agile as well as smaller organizations that may lack the infrastructure and resources to manage and maintain on-premises platforms.

Today, organizations need to be nimble and so do their strategic solutions and platforms. The emergence of cloud-based solutions enables enterprise platforms that once took months and sometimes even years to deploy to be stood up in just a few hours. Cloud-based solutions provide organizations more options for implementation to best meet their specific business challenges and objectives.

## Overview

Archer<sup>®</sup> SaaS enables organizations to leverage the flexibility, availability and scalability of the cloud, coupled with the depth and breadth of the Archer Platform, to comprehensively and proactively manage risk. Archer SaaS is offered on the Amazon Web Services (AWS) platform, with features and functionality that match on-premises deployments. With Archer SaaS, your organization can leverage the power and scalability of the cloud to help address your business risk and global compliance challenges. To provide the necessary tools and support to ensure success, the Archer SaaS includes an embedded Customer Success Manager (CSM). The CSM works with you to help ensure your integrated risk management (IRM) program running on Archer SaaS delivers maximum value.

## Key Features

- Rapid cadence of innovation, improvement and updates to the Archer Platform
- Solution and feature set matches Archer on premises
- Prescriptive IRM solution options
- Enhanced security, performance and scalability
- Embedded Customer Success Manager
- Single sign-on
- Global AWS data centers

## Key Benefits

With Archer SaaS, you can:

- Get fast time to value by standing up an instance in days/hours
- Leverage the flexibility and scalability of the cloud to support your organization's growing IRM and business needs
- Access the latest releases and functionality more quickly
- Lower your total cost of ownership
- Rely on global AWS data centers
- Remove operational burden and expenditures for capital hardware and ongoing IT-related activities
- Count on mission-critical resiliency and committed SLA

## About Archer

Archer is a leading provider of integrated risk management (IRM) solutions that enable customers to improve strategic decision-making and operational resilience with a modern technology platform that supports qualitative and quantitative analysis driven by both business and IT impacts. As true pioneers in GRC software, Archer remains solely dedicated to helping customers manage risk and compliance domains, from traditional operational risk to emerging issues such as ESG. With over 20 years in the risk management industry, the Archer customer base represents one of the largest pure risk management communities globally, with more than 1,200 customers including more than 50% of the Fortune 500.
