

Archer[®] ESG Management

As the world and markets are continually changing and doing so at an ever-increasing pace, many organizations find themselves reacting to change and trying to keep up with it rather than seizing the opportunity it presents. Environmental, social, and governance (ESG) identifies, measures, and tracks an organization's policies and processes impact on environmental, social, and governance areas. Implementing strong environmental, social, and governance practices is the key to an organization's ability to grow, innovate and ensure its success today and continued longevity well into the future.

ESG is more than just enacting policies to address the social concerns of the day. For example, in a study conducted by the University of Oxford*, 88% of companies with robust ESG practices achieved better operational performance. In addition, the same study revealed that 80% of companies with prudent sustainability practices positively influenced their stock price.

These positive results should not be surprising. Organizations with more diverse workforces can bring multiple points of view and perspectives to the table, often resulting in faster innovation and new ideas to solving problems and a better understanding of how to adapt to global pressures and changes than organizations that do not. And it's not just about having a diversified workforce that enables organizations to outperform their rivals. By implementing responsible social and sustainability policies and programs that help lessen corporate environmental impact, organizations can better deal with global crisis such as rising energy prices, access to resources, and enact better operational resilience programs.

Organizations that embrace and implement robust and effective ESG programs benefit society, investors, stakeholders and ultimately assure the organization's ability to thrive and survive long into the future.

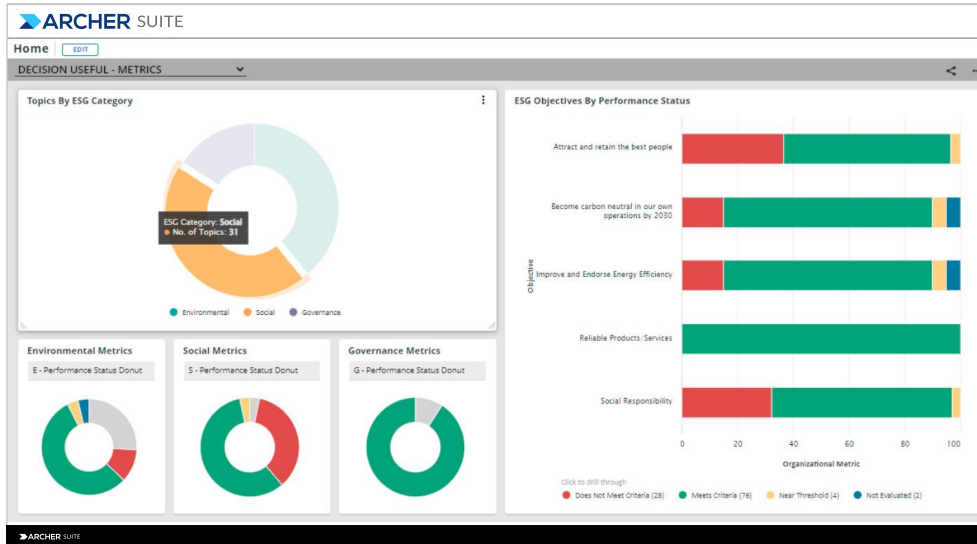

The Archer ESG Management Advantage

Solution

The Archer ESG Management solution provides enterprise-wide assessment, mapping, monitoring, reporting, and quantification of the organization's environmental, social, and governance programs. Archer ESG Management delivers business leaders a complete and aggregated view of the organization's value chains and its ability to meet its social and sustainability responsibilities. Executives and Board members can use Archer ESG Management's graphical, real-time reporting and dashboards to visualize and evaluate compliance, environmental impact, and supply chain risk with quantifiable data and metrics. This actionable data helps inform better decision-making and achievement of corporate goals while mitigating risk and ensuring the business takes steps to ensure its success.

Archer ESG Management enables ESG data to be gathered and integrated in Archer's centralized IRM platform. By implementing Archer ESG Management as a part of a broader IRM program, business leaders and executives have access to quantifiable risk data that provides the insight and tools needed to protect the business while adhering to ESG policies.

Features

- Map your ESG data against industry standards, including SASB, GRI, and corporate frameworks.
- Automate ESG & business objectives mapping with automated risk analysis.
- Create, track, and execute project plans to hit targets and milestones.
- Enable real-time alerts that monitor third-party risk, so you can address any issues before they become a problem.
- Incorporate 3rd party and supply chain impacts to corporate ESG strategy.

Key Benefits

- Monitor and act on current and future ESG risks.
- Gain clarity on evolving regulations, requirements, and liabilities.
- Assess performance against thresholds using intuitive, graphical reporting and dashboards.
- Gain insight into ESG metrics from analytics and visualization data representation.
- Conduct project and transition planning to prepare for carbon-neutral footprint.
- Provide investors, stakeholders, and regulators with actionable, real-time reporting on ESG initiatives and scorecard metrics.
- Improve the organization's long-term performance and viability.
- Centralize ESG data and leverage broader risk management capabilities in the Archer IRM platform.
