

Archer® Third Party Catalog

Use Case for Third Party Governance

The Challenge

Organizations are increasingly using third parties to support their operations and deliver products and services to their clients. In doing so, organizations inherit the risks associated with these third-party relationships. Many of these risks can lead to significant problems for the organization, including information security breaches, regulatory compliance violations, financial losses, fraud, business interruption, and reputational damage.

Overview

Archer® Third Party Catalog allows you to document all third-party relationships, engagements, and associated contracts, as well as the business units and named individuals in your organization that are responsible for each third-party relationship. With Archer, you can report on all third-party information—including profiles, engagements, third-party business hierarchy, contacts, facilities, accountable third-party contacts, and more—within a single repository.

Key Features

- Catalog your organization's business hierarchy to establish appropriate stakeholder reporting.
- Catalog suppliers, vendors, partners, service providers and other third parties.
- Capture third-party details and contracts.
- Perform vendor criticality tiering.
- Mapping of internal business units to engagements.
- Establish accountability for each third-party relationship.
- Exception tracking and remediation for third-party relationships.

Key Benefits

With Archer Third Party Catalog, you can:

- Efficiently manage your third-party relationships.
- Enhance awareness of all third-party relationships throughout the organization.
- Reduce time spent identifying and managing third-party relationships and contracts.
- Establish accountability for individual supplier relationships.
- Enable faster identification of relationship owners.
- Produce a report of all third-party relationships used throughout your organization.
- Ability to track contract terms, including notification of key contract events, such as contract obligations and renewal and expiration dates.

▼ DETAILS

Third Party Since: 5/6/2011	Website: http://www.emc.com
Primary Industry: Technology	Ownership: Corporation
Secondary Industry: Computer And Data Services	Ticker Symbol: EMC
DUNS Number: 601838660	Fiscal Year End: December
NANCS Code: 334613	Minority Certification: Not Applicable
SIC Code: 3695	Number of Employees: >50,000
Description: We manage our business in two broad categories: EMC Information Infrastructure and VMware Virtual Infrastructure. As data centers move to a Cloud Computing model, managing information will be central to their operations. EMC Information Infrastructure provides a foundation for organizations to store, manage, protect, analyze and secure their vast and ever-increasing quantities of information. Improve business agility, lower cost of ownership and enhance their competitive advantage within traditional data centers, virtual data centers and cloud-based IT infrastructures. Infrastructure for Cloud Computing is much more agile and efficient - this is achieved through virtualization. VMware Virtual Infrastructure, which is represented by EMC's majority equity stake in VMware, Inc. ("VMware"), is the leader in virtualization infrastructure solutions.
