

Archer Sustainability Reporting

Businesses have increasingly prioritized Environmental, Social, and Governance (ESG) reporting to measure their commitment to sustainability and responsible corporate practices. Many companies are now aware of the importance of measuring and managing ESG performance to reduce risks and seek out opportunities for growth.

ESG reporting frameworks have emerged to assist companies in complying with their ESG responsibilities. Two of the most significant sustainability reporting frameworks impacting organizations in the EU and abroad are the TCFD framework and the GRI initiative.

TCFD Framework:

The TCFD (Task Force on Climate-related Financial Disclosures) framework guides companies in disclosing their climate-related financial risks. The framework includes recommendations on how companies can disclose information regarding their governance, strategy, risk management, metrics, and targets related to climate change risks and opportunities. The TCFD framework is aimed at companies across all sectors and is especially relevant to those in industries that are most affected by climate issues like energy, finance, and transportation.

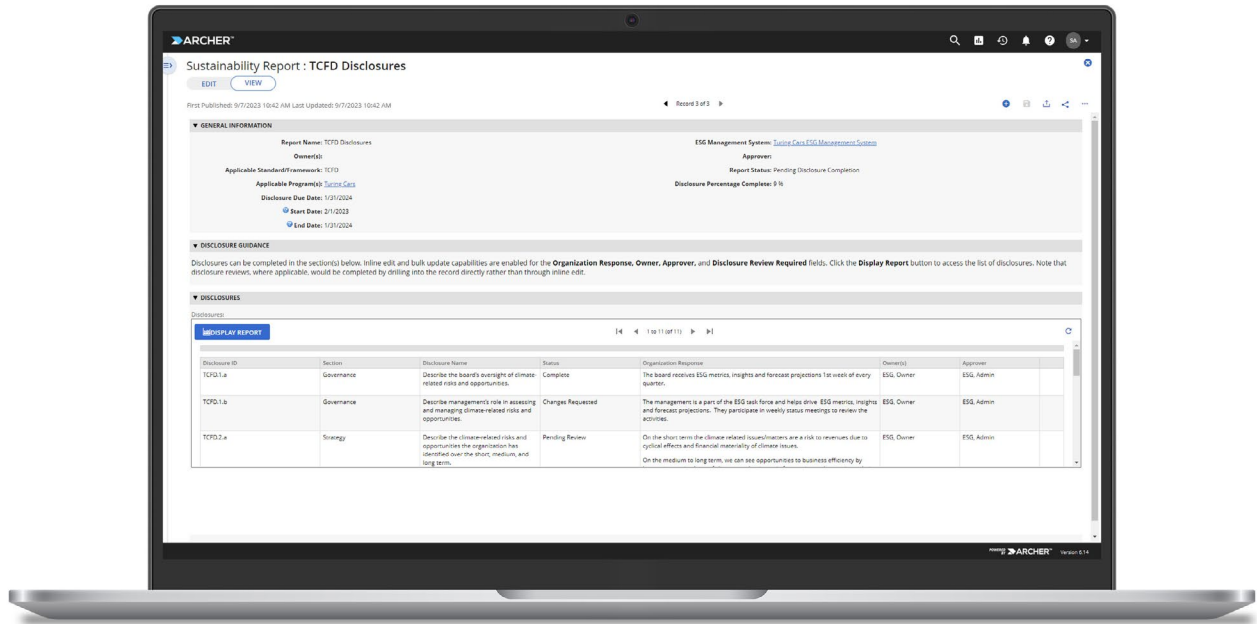

GRI 2 General Disclosures Initiative:

The GRI (Global Reporting Initiative) is a reporting framework established to guide companies on how to report their sustainability performance. GRI 2 is a separate initiative within the GRI framework that provides companies with guidance on reporting their general disclosures related to governance, strategy, stakeholder engagement, and reporting scope. The GRI 2 initiative is aimed at companies across all industries and is especially relevant to those who have already started reporting on their sustainability performance.

The Archer ESG Advantage

The Archer Sustainability Reporting use case is a comprehensive solution addressing the growing demand for transparency in ESG reporting. Serving small businesses and large corporations, providing a complete solution that aligns with the TCFD framework & GRI 2 General Disclosures initiative. Business leaders, Senior Management, Executives, and Board members can use Archer ESG Sustainability Reporting's graphical, real-time reporting and dashboards to view and evaluate compliance, environmental impact, and supply chain risk with quantifiable data and metrics. This actionable data helps inform better decision-making and achievement of corporate goals while mitigating risk and ensuring the business takes steps to ensure its success.

By implementing Archer ESG solutions with a broader Archer IRM program, business leaders and executives can access quantifiable risk data, providing the insight and tools needed to protect the business while adhering to their ESG policies.

Features

- Align reporting to TCFD & GRI 2 General Disclosures.
- Sustainability Reports.

Benefits

- Alignment with major ESG reporting frameworks and disclosures.
- Real-time insights into ESG reporting and graphical dashboard readouts.
- Informed decision-making using actionable data aligned to ESG reporting frameworks.

About Archer

Archer is a leading provider of integrated risk management (IRM) solutions that enable customers to improve strategic decision-making and operational resilience with a modern technology platform that supports qualitative and quantitative analysis driven by both business and IT impacts. As true pioneers in GRC software, Archer remains solely dedicated to helping customers manage risk and compliance domains, from traditional operational risk to emerging issues such as ESG. With over 20 years in the risk management industry, the Archer customer base represents one of the largest pure risk management communities globally, with more than 1,200 customers including more than 50% of the Fortune 500.
